Cosiness rules at the Share design table

Round, square or free shape, the Share table integrates perfectly into any room and adapts to your needs. The solid oak table top gives this table a robust, timeless look. For a cosy dinner, a hearty breakfast or a spontaneous chat with a cup of coffee.

Warm and flexible

The Share design table stands for warmth and cosiness thanks to its solid oak table top. Share is extremely flexible in design. This way you decide what your table will look like: round, square or a free shape. It is also available in various colours. Tailor Share to your interior and combine it with the comfortable Hello dining chair.

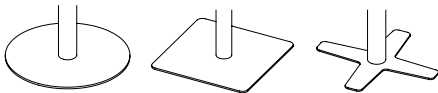

Thoughtful design

With its round, square or cross-leg, Share provides the necessary stability at the table and follows the line of your chosen table top. Share is designed with integrated floor caps under the floor plate, so that it does not touch the ground completely. This creates air circulation under the plate and prevents dirt accumulation and rust from getting a chance.

Big or small, young or old, with Share you share all the beautiful moments.

FLOOR PLATE

Floor plate in 8 mm thick black polished steel fitted with felt floor protectors at the bottom. The floor plate is available in three shapes: round, square with rounded corners with radius 30 mm and cross-shaped.

The dimensions of the floor plate depend on the size of the table top. Free-shape table tops use two floor plates of different sizes.

CENTRAL COLUMN LEG

The central column leg consists of a round steel column in black polished steel in two sizes depending on the size of the table top.

The central column leg has a diameter of 76 mm and a wall thickness of 2 mm for table tops up to and including a length or diameter of 90 cm.

The central column leg has a diameter of 102 mm and wall thickness of 2 mm for table tops from length or diameter of 90 cm.

TABLE HEIGHT

Total height of the table is 76 cm. For all tables, the clearance (the height from the floor to the bottom of the table top) is 72 cm, suitable for wheelchairs.

TABLE TOP AND TOP PLATE

The table top is attached to the table leg via a top plate in black polished steel. The top plate has a diameter of 45 cm and is 6 mm thick.

The table top is made of solid oak, and there is a choice of square, round or free shape. The table tops have a thickness of 4 cm. Square table tops have four straight corners. The free-shape table tops have a faceted edge.

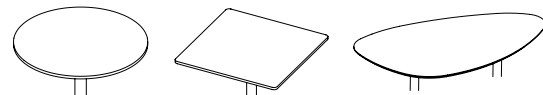

TABLE CONSTRUCTION

The central column leg is attached with bolts to the table top via a metal top plate bolted to the table top. The table rests on the floor on a metal floor plate, attached with bolts to the central column leg.

COLOUR OPTIONS

The Share design table is available with black column and foot and solid wood table top in various colours depending on the shape of the table top. A complete overview of all colours can be found at www.tuoi.be/materialen.
